# Affiniti Architects Designs First Solar-Powered Home in Cat Cay, Bahamas

Affiniti Architects has been commissioned to design the first solar-powered home on Cat Cay, Bahamas.

Plans call for the solar energy with backup diesel generator to provide water and electricity for the 5,000-square-foot residence.

Affiniti also designed two recently completed "green" homes in Jupiter, FL, for Palm Beach Gardens-based Solaris Home Systems. The properties, in addition to featuring solar power, are wired through a patent-pending Solaris system to turn off their own lights, lower their own shades and water their own lawns as needed.

**Ron Rickert, AIA,**  
Affiniti Architects,  
Boca Raton

To maximize ocean views for the Bahamian property, Affiniti is planning a two-story octagon-shaped residence with observation tower. The home, expected to feature Caribbean wood beams, louvers and shingle accents, is to include three bedrooms, three-and-one-half baths and a spacious, centrally located great room.

*Affiniti is a full-service architectural firm with headquarters in Boca Raton and offices in Tampa and the Bahamas.*

*The company specializes in luxury resorts, communities and multi- and single-family residences, and has completed several projects in North Carolina, the Caribbean and Central America.*

*Affiniti has earned more than 200 national and regional design awards for residential architecture, including numerous "Best of Show" awards from the Builders Association of South Florida.
